Safety Alert

Flying Debris from Trucks TO ALL DRIVERS

When in a road lining operation, after chaining your load, walk around your truck and trailer and ensure you do a good visual inspection of your load to ensure that you have not picked up any debris or foreign objects in your load that may have jammed in between the logs etc. Debris examples, rocks, slash, bark, broken logs etc.

The debris can come off your truck during transit and become a potential missile, which has the potential to cause harm or death.
